Financing a Net-Zero Carbon Future

NEO:NETZ | OTCQB:OFSTF | FSE:M2Q

FEBRUARY 2022
Advisories

This presentation ("Presentation") is being issued by Carbon Streaming Corporation (the "Company" or "Carbon Streaming") for information purposes only. The content of this Presentation has not been approved by any securities regulatory authority. Reliance on this Presentation for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested.

This Presentation is not an admission document, prospectus or an advertisement and is being provided for information purposes only and does not constitute or form part of, and should not be construed as, an offer or invitation to sell or any solicitation of any offer to purchase or subscribe for any securities of the Company in Canada, the United States or any other jurisdiction. This Presentation should not form the basis of, or be relied on, in connection with or act as an inducement in relation to a decision to purchase or subscribe for, enter into any contract, or make any commitment whatsoever in relation to any securities of the Company. No representation or warranty, express or implied, is given as to the accuracy, sufficiency or completeness of the information or opinions contained in this Presentation and no liability whatsoever is accepted by the Company, its directors, officers or advisors or any other person for any loss howsoever arising, directly or indirectly, from any use of such information or opinions or otherwise arising in connection therewith.

This Presentation contains certain forward-looking statements and forward-looking information (collectively, “forward-looking information”) within the meaning of applicable securities laws. All statements, other than statements of historical fact, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future (including, without limitation, expectations regarding the growth of the voluntary carbon markets; future price of carbon credits and sensitivity to changes in such prices; industry conditions and outlook pertaining to the carbon markets; statements and figures with respect to the timing and estimation of future carbon credit generation from the Company’s existing investments; revenue from the sales of carbon credits; the generation of local community benefits; potential streaming deal pipeline and anticipated rates of returns from those investments; expected timing and value of carbon credit streams acquired; the ability to acquire additional investments; the estimated values associated with such additional investments; the Company’s objectives, strategies and competitive strengths; and statements regarding the Company’s financial future) are forward-looking information.

This forward-looking information is based on the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking information is subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Company. Factors that could cause actual results or events to differ materially from current expectations include, among other things: dependence on key management; limited operating history for the Company’s current strategy; volatility in market prices and demand for carbon credits; effects of competition and pricing pressures; changes in general economic financial, market and business conditions; and the other risks disclosed under the heading “Risk Factors” and elsewhere in the Company’s Annual Information Form dated as of September 27, 2021 filed on SEDAR at www.sedar.com. Any forward-looking information speaks only as of the date of this Presentation. Except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

Carbon credit volumes: are estimated based on forecasts provided by project developers and historical credit generation by the project. Actual results may vary. For the Rimba Raya project, volumes reflect receiving two annual verification cycles of credits; for the Cerrado Biome project, volumes reflect receiving four annual verification cycles of credits. Attributable volumes: are composed of credits attributable to the Company, which is calculated based on the carbon credits estimated to be verified by the registry, less (i) credits committed to previous buyers and (ii) credits that are subject to stream participation rights. Delivery payment to project developers is subject to fluctuation based on the net realized price obtained on the sale of carbon credits and the terms of the carbon credit stream agreement. There can be no assurance that the Company will be able to enter into definitive agreements for, or otherwise complete the acquisition of, all or any of the potential carbon streaming transactions referenced above, nor provide any assurance that the stated targeted after-tax internal rates of return will be realized by the Company.

The values in this Presentation are expressed in United States dollars, unless otherwise stated. Some figures presented are rounded and data in tables may not add due to rounding.
Carbon Market Opportunity
Voluntary carbon markets expected to grow 15x by 2030, potentially 100x by 2050

Proven Streaming Model
Highly attractive and proven model that aligns interests

Technical and Financial Expertise
Management team has executed streaming investments totaling over $2 billion Supported by team of carbon experts

World-Class Assets
Carbon credit streams executed on several world-class projects

True Impact Investing
Strategic partnerships in place to maximize climate, community and biodiversity co-benefits

Attractive Investment Pipeline
Pipeline of near-term streaming opportunities of ~US$200 million

Voluntary carbon markets expected to grow 15x by 2030, potentially 100x by 2050
Highly attractive and proven model that aligns interests
Management team has executed streaming investments totaling over $2 billion Supported by team of carbon experts
Carbon credit streams executed on several world-class projects
Strategic partnerships in place to maximize climate, community and biodiversity co-benefits
Pipeline of near-term streaming opportunities of ~US$200 million
Experienced Leadership Team

Management Team
Extensive capital markets, streaming and corporate finance expertise

- Justin Cochrane, CFA
  CEO & Director
- Geoff Smith, CFA
  President & COO
- Michael Psihogios, MBA
  Chief Investment Officer
- Anne Walters, JD, MBA
  General Counsel & Corporate Secretary

Board of Directors
Extensive governance expertise

Voluntary Carbon Credits

PUTTING A PRICING ON EMISSIONS

Carbon Credit
also known as a carbon offset

One carbon credit = One tonne of GHG emissions that can be offset

Used by individuals, corporations and organizations that voluntarily want to offset their emissions

Represents the avoidance, reduction or sequestration of one tonne of a CO₂ equivalent from the atmosphere

Can be resold multiple times until retired by the end user that claims the offset’s impact

Based on verification standards set by non-profit independent registries

Can have co-benefits, such as job creation, healthcare and preservation of biodiversity

Voluntary Carbon Markets by Project Category*

- Forestry & land use (52%)
- Renewable energy (36%)
- Energy efficiency / Fuel switching (7%)
- Waste disposal (1%)
- Household devices (1%)
- Other (3%)

Avoidance / Reduction Projects

- Avoided Deforestation
- Renewable Energy
- Methane Capture

Removal / Sequestration Projects

- Reforestation / Afforestation
- Direct Air Capture and Storage
- Biochar Utilization
Supporting Natural Carbon Sinks

PROTECTING THE EARTH’S FORESTS IS IMPERATIVE TO ACHIEVING NET ZERO

Carbon Storage in Earth’s Ecosystems

United Nations Framework Convention on Climate Change

UNFCCC created the REDD+ (Reducing Emissions from Deforestation and forest Degradation) framework to measure and value natural carbon stocks as they change over time.

- Earth’s forests absorb ~15.6 Gt CO₂ per year
- Deforestation, fires and other disturbances release ~8.1 Gt CO₂ per year
- This is ~8x annual CO₂ emissions from the global aviation industry
- As a country, this amount represents 2nd largest emitter behind China

Sources: IPCC, NASA, Our World in Data
Proven Streaming Model
HIGHLY ATTRACTIVE AND PROVEN MODEL THAT ALIGNS INTERESTS

Benefits to Carbon Streaming
✓ Not responsible for operating costs or capital costs
✓ Annual yield with credits received each year during term
✓ Potential value appreciation with purchase terms set upfront
✓ Security on assets
✓ Independent verification
✓ Established buffer pools

Benefits to Project Developers
✓ Provides upfront cash and annual income for decades
✓ Sales channel to monetize carbon credits
✓ Maximize value received from credit sales with revenue sharing structure
✓ Ability to accelerate community investment
✓ Assistance with registration and verification
Carbon Credit Investment Portfolio

DIVERSE AND HIGH-QUALITY PORTFOLIO OF CARBON CREDITSTREAMS AND INVESTMENTS

Notes:
1. Carbon Streaming has made an initial investment in the Bonobo Peace Forest, which will be directed to prepare feasibility studies and establish initial project activities.
2. Carbon credit volumes are estimated based on forecasts provided by project developers and historical credit generation by the project. See Advisories.
3. Attributable volumes are composed of credits attributable to the Company. See Advisories.
4. Delivery payment to project developers is subject to fluctuation. See Advisories.
Rimba Raya Biodiversity Reserve Project

WORLD-CLASS TRAILBLAZING PROJECT

One of the world’s largest REDD+ projects

Reduces emissions by ~3.5 Mt CO₂e per year

First REDD+ project and first "triple-gold" Climate, Community and Biodiversity project independently validated by Verra

Preventing ~64,000 ha of tropical peat swamp forests from being converted to palm oil plantations

Carbon credit stream to purchase all future carbon credits not already committed to other buyers

Historical credit purchases from Delta Airlines, Gucci, PwC, Zurich Insurance and many other large corporations

Impact Beyond Carbon

ONLY project verified under the Sustainable Development Verified Impact Standard for contributing to all 17 UN SDGs.

- Protecting over 600 species of flora/fauna and 100 local animal species, including the Bornean Orangutan
- Numerous community programs: water filtration systems, healthcare facilities, educational scholarships, solar energy
- Portion of revenue from the sale of credits supports community development and infrastructure
Carbon Streaming Investment Portfolio
HIGH QUALITY REDD+ PROJECTS AT DIFFERENT STAGES OF DEVELOPMENT

MarVivo Blue Carbon Project
Baja California Sur, Mexico
Mangrove forest and associated marine habitat conservation
✓ ~22,000 ha of mangroves and ~137,000 ha of marine ecosystem
✓ Development Stage
✓ ~0.8 million carbon credits per year
✓ Carbon credit stream to purchase greater of 200,000 credits or 20% of annual carbon credits each year

Cerrado Biome Project
Cerrado Biome, Brazil
Protect native forests and grasslands from converting to commercial agriculture
✓ ~11,000 ha currently, plans to scale
✓ Awaiting Project Validation
✓ ~0.5 million carbon credits per year
✓ Initially to generate 0.1 million credits per year; expected to scale up to an average of 0.5 million per year

Bonobo Peace Forest Projects
Democratic Republic of Congo
Improved forest management to prevent deforestation
✓ ~3,500,000 ha of natural reserves (Sankuru and Kokolopori)
✓ Feasibility Study
✓ Potential to reduce/avoid hundreds of millions of tonnes of CO₂ over 30 years
✓ Exclusive term sheet for initial funding

Notes:
1. Represents total annual carbon credit generation for the project(s).
2. Carbon Streaming has made an initial investment, which will be directed to prepare feasibility studies and establish initial project activities.
Delivering Beyond Carbon
ADVANCING UN SUSTAINABLE DEVELOPMENT GOALS THROUGH IMPACT INVESTING

Preserving Biodiversity
- Protecting endangered species, such as the bonobos at the Bonobo Peace Forest
- Protecting marine life at MarVivo
- Adopting best practices for soil health at Cerrado

Improving Livelihoods
- Floating healthcare clinic, solar lanterns and water filters at Rimba Raya
- Establishing new economic opportunities, such as sustainable sea scallop farming at MarVivo
- Water quality monitoring at Cerrado

Empowering People
- Scholarships, training and financing micro enterprises for women at Rimba Raya
- Promoting initiatives that support women
- Improving physical and technological infrastructure
Robust Pipeline of Streaming Opportunities

STRONG POSITION TO EXECUTE INVESTMENT STRATEGY

Carbon Streaming has sourced a potential deal pipeline of over US$700 million with its near-term pipeline valued at approximately US$200 million at target IRRs of 15%+

Pipeline Breakdown By Project Type

- Technology: 64%
- Energy: 21%
- Community: 9%
- Nature: 6%

Pipeline Breakdown By Region

- Europe: 26%
- Africa: 26%
- South America: 26%
- Asia: 14%
- Australia: 5%

Notes:

1. Pipeline projects may have more than one project type and as a result may be counted one or more times under the "Pipeline Breakdown by Project Type"; charts weighted by number of projects.
2. The potential carbon streaming transaction pipeline represents an estimate by management based on potential investment opportunities and estimated values of such opportunities, which remain under various states of non-binding proposal, negotiation and/or evaluation by the Company. See Advisories.
Creating A Portfolio of High-Quality Credits

INDEPENDENT VERIFICATION SUPPLEMENTED WITH DUE DILIGENCE

Life Cycle of a Voluntary Carbon Credit

- **Project Design**
  Project design and methodology for quantifying GHG emission reductions submitted to registry

- **Project Validation**
  Third-party auditor conducts an independent review and presents their report to the registry for approval

- **Project Development**
  After receiving registry approval and initial funding, project is developed

- **Verification**
  Third-party auditor verifies net GHG emission reductions and carbon credits are issued

- **Issuance / Transfer / Retirement**
  Registry tracks the issuance, transfer and retirement of carbon credits

---

How We Ensure Credit Integrity

- Seek project developers with a successful track record
- Projects to be validated and verified in accordance with recognized standard
- Undertake technical, financial and legal due diligence
- Engage third party auditors

---

Four Main Voluntary Market Registries:

- Verra
- Gold Standard
- American Carbon Registry
- Climate Action Reserve
Demand Drivers
CATALYSTS FOR THE VOLUNTARY CARBON MARKET

Shareholder Pressure
Companies are facing pressure from asset managers and shareholders to address emissions

Regulatory Disclosure
Companies looking to avoid reputational risk due to required climate risk disclosure

Paris Agreement
Companies that want to align with the net-zero goal of the Paris Agreement

Technology Gaps
Companies are limited by technologies that are available at scale and not cost-prohibitive

Time Gaps
Companies do not have the means to eliminate all emissions today
Voluntary Markets Demand Growth

2021 was a record year with over US$1 billion in credit transactions.

Voluntary carbon markets are less than 1% the size of the compliance carbon markets with total transaction value in 2021 over US$1 billion.

Demand for voluntary carbon credits forecast to grow 15x by 2030 and the market could be worth up to US$50 billion per year.

Demand for voluntary carbon credits forecast to grow 100x by 2050.

*Note: 2020 data represents demand estimated for that year based on climate commitments of more than 700 large companies. NGFS= Network for Greening the Financial System. These amounts reflect demand based on CO₂ removal and sequestration requirements under the NGFS's 1.5°C and 2.0°C scenarios. Both amounts reflect an assumption that all CO₂ removal and sequestration results from carbon credits purchased on the voluntary market (whereas some removal and sequestration will result from carbon credits purchased in compliance markets and some will result from efforts other than carbon-offsetting projects).

2021 Asset Class Performance

Carbon was one of the best performing asset classes in 2021

Source: Bloomberg; ClearBlue Markets
Higher Carbon Prices are Needed for Net Zero

**PRICES EXPECTED TO RISE DUE TO THE MARGINAL COST TO DECARBONIZE**

### Conservation Carbon Abatement Cost Curve

Based on current technologies and current costs, assuming economies of scale for technologies in the pilot phase

**Low-cost decarbonization**
- 55% Power gen
- 27% Agriculture
- 15% Industry and waste
- 3% Buildings
- 1% Transport

**High-cost decarbonization**
- 43% Industry and waste
- 30% Transport
- 13% Buildings
- 9% Power gen
- 5% Agriculture

### Carbon Sequestration Cost Curve

Less steep vs. conservation curve but has higher uncertainty given limited investment to date and the largely pilot nature of these technologies

- Industrial carbon capture, utilization and storage technologies (CCUS)
- Direct air carbon capture and storage (DACCS)

**Natural sinks**

### Share Price Performance Since July 2021 Private Placement

~57%

Jul 19, 2021 to Feb 25, 2022

Source: Share prices from Stockwatch.

Note: Capital structure as at February 9, 2022. Market capitalizations based on closing share price on February 25, 2022 and exchange rate of US$1.00 for every C$1.27. July 2021 private placement was priced at US$5.00 per Special Warrant where each Special Warrant consisted of one common share and one warrant exercisable at US$7.50/share (shown on a post-consolidation basis). Private placement price was converted at an exchange rate of US$1.00 for every C$1.28. The Company’s common shares started trading on the NEO Exchange on July 27, 2021.
Key Milestones
RAISED ~US$140M, PUBLIC LISTING, GROWING PIPELINE

2020
- Carbon Streaming Corp. is established
- Name changed and new business focused on carbon credit streams and investments

2021
- New Board of Directors appointed and an Advisory Board created
- Company raises C$48M in 1H 2021
- Bonobo Peace Forest
  - Exclusive term sheet signed for two carbon credit projects
- MarVivo Blue Carbon Project
  - First carbon credit stream announced
- Rimba Raya Biodiversity Reserve Project
  - Carbon credit stream announced

2022
- Company raises US$105M in July 2021
- Stock Begins Trading
  - Company begins trading on the NEO Exchange (NETZ) and the Frankfurt Stock Exchange (M2Q)
- Cerrado Biome Project
  - Carbon credit stream announced
- Future carbon credit streams and investments to be announced
- Pursue U.S. listing strategy
## Investment Highlights

| **Exposure to Carbon Markets** | ✓ Exposure to the emerging asset class of carbon and potential rising prices  
|                               | ✓ Studies indicate carbon prices need to reach US$100/t CO₂e by 2030 to achieve the goals of the Paris Agreement |
| **Technical & Financial Expertise** | ✓ Management team has executed over 50 streaming investments totaling over $2 billion  
|                               | ✓ Supported by an advisory board with experts in carbon markets and carbon offset projects |
| **Partner to Project Developers & Buyers** | ✓ A long-term partner to project developers with strategically aligned interests for the life of the project  
|                               | ✓ Trusted source for high integrity credits, especially those seeking credits that advance sustainability goals |
| **High Quality & Diversified Portfolio** | ✓ Portfolio of carbon credit streams and investments in world-class carbon offset projects  
|                               | ✓ Strong balance sheet to pursue a pipeline of ~US$200 million in near-term potential streaming opportunities |
| **True Impact Investor** | ✓ Our stream financing model brings capital to projects that otherwise may not be developed  
|                               | ✓ Focused not only on climate action but making an impact beyond carbon to create a more sustainable future |
Appendix
Management Team

Justin Cochrane  
CEO & Director  
- 20+ years of royalty and stream financing experience  
- Former President & COO of Cobalt 27 Capital Corp.  
- Former Executive Vice President and Head of Corporate Development for Sandstorm Gold Ltd.

Anne Walters  
General Counsel & Corporate Secretary  
- Nearly 20 years of experience in the Canadian corporate sector  
- Former head of the Canadian legal team at Frontera Energy Corporation, a TSX-listed energy company  
- Previously worked at Stikeman Elliott LLP in the areas of corporate finance and M&A

Geoff Smith  
President & COO  
- 15+ years of corporate finance experience  
- Former Managing Director for Scotiabank’s Investment Banking Division  
- Advised on or financed many of the largest and most complex and innovative streaming transactions in the past 10 years

Conor Kearns  
Chief Financial Officer  
- Nearly 20 years of accounting, auditing, finance and tax structuring experience  
- Former VP of Finance of Cobalt 27 Capital Corp.  
- Former CFO of EFT Canada, an electronic payments business

Michael Psihogios  
Chief Investment Officer  
- 15+ years of financing, M&A and corporate finance experience  
- Former CFO of DUMAS, a specialized construction and engineering firm  
- Previously worked in private equity and at National Bank Financial in the investment banking group

Geoff Smith  
President & COO  
- 15+ years of corporate finance experience  
- Former Managing Director for Scotiabank’s Investment Banking Division  
- Advised on or financed many of the largest and most complex and innovative streaming transactions in the past 10 years

Conor Kearns  
Chief Financial Officer  
- Nearly 20 years of accounting, auditing, finance and tax structuring experience  
- Former VP of Finance of Cobalt 27 Capital Corp.  
- Former CFO of EFT Canada, an electronic payments business

Michael Psihogios  
Chief Investment Officer  
- 15+ years of financing, M&A and corporate finance experience  
- Former CFO of DUMAS, a specialized construction and engineering firm  
- Previously worked in private equity and at National Bank Financial in the investment banking group

Alec Kushnir  
EVP, Energy Carbon Credit Origination  
- 25+ years of experience in energy sector  
- Former VP of Business Development for New Fortress Energy, a leading LNG to power fuel supplier  
- Previously worked at Noble Group, ANZ Investment Bank, Sithe Energies and Dresdner Kleinwort Benson

Amy Chambers  
Director, Marketing, Communications & Sustainability  
- 20 years of experience executing strategic initiatives for corporations and non-profits  
- Studied Environmental Law & Social Justice at Harvard Extension School  
- GRI Sustainability Reporting Standards certification from LEAD Canada
Board of Directors

Maurice Swan, Chairman
- General Counsel of Superior Gold Inc. and Former Partner at Stikeman Elliott LLP, where he practiced corporate law for over 24 years
- Earned leading lawyer accolades from various publications

Justin Cochrane, CEO
- 20+ years of royalty and stream financing experience
- Former President & COO of Cobalt 27 Capital Corp. and Former Executive Vice President and Head of Corporate Development for Sandstorm Gold Ltd.

Marc Bustin
- Professor of Geology at the University of British Columbia and has published over 200 peer reviewed scientific articles
- President of RMB Earth Science Consultants and CTO for Renewable Geo Resources Ltd.

Saurabh Handa
- CFO for Metalla Royalty & Streaming Ltd., a TSX-V-listed and NYSE-listed precious metals royalty and streaming company
- Previously was CFO of Titan Mining Corp., VP, Finance of Imperial Metals Corp, CFO of Meryllion Resources Corp. and CFO of Yellowhead Mining Inc.

Candace MacGibbon
- CPA with over 25 years of experience in the mining sector and capital markets
- Director of Osisko Gold Royalties Ltd. and former CEO of INV Metals Inc.

Alice Schroeder
- Professional director and former CEO and chair of WebTuner Corp.
- Former Managing Director at Morgan Stanley, CIBC Oppenheimer and PaineWebber

Andy Tester
- A naturalist and labor advocate, who has devoted 20 years to raising awareness on the plight of endangered salmon and steelhead in the Pacific Northwest and Alaska
- Member of the International Longshore & Warehouse Union

Jeanne Usonis
- Director at Regent Advisors LLC, a corporate finance advisory firm
- Previously worked at N M Rothschild & Sons (Washington) LLC and Salomon Smith Barney

Saurabh Handa
- CFO for Metalla Royalty & Streaming Ltd., a TSX-V-listed and NYSE-listed precious metals royalty and streaming company
- Previously was CFO of Titan Mining Corp., VP, Finance of Imperial Metals Corp, CFO of Meryllion Resources Corp. and CFO of Yellowhead Mining Inc.
Advisory Board

Kristen Kleiman
- Institutional investment expert with over 25 years of experience
- Former Chief Investment Officer at The Climate Trust, a national leader in the development of high-quality greenhouse gas offset projects
- Prior member of board of directors for two international forestry companies

Mike Harcourt
- Former premier of British Columbia, mayor of Vancouver and city councilor
- Honorary co-chair at the University of British Columbia’s President’s Advisory Council on Sustainability
- Associate Director at Centre for Sustainability Continuing Studies at UBC

Sean Roosen
- Executive Chair of the Board of Directors of Osisko Gold Royalties Ltd
- Founding member of Osisko Mining Corporation and of EurAsia Holding AG, a European venture capital fund
- Awarded best CEO in North America by Mines & Money Americas in 2017

Robert Falls, Ph.D.
- 20+ years of experience on carbon and climate mitigation projects
- Adjunct Professor at UBC’s Forest Sciences Centre
- Acted as Senior Advisor to the GLOBE Foundation of Canada’s Energy and Environmental program

Bart Simmons
- 40+ years of silviculture and watershed management experience
- President at Quilicum Environmental Services Ltd.
- Former COO at REDD Systems LLC

Key Partnerships and Membership
