## NEWS RELEASE

# CARBON STREAMING TO PARTICIPATE IN INAUGURAL CANADIAN CLIMATE INVESTOR CONFERENCE

TORONTO, ON, May 24, 2023, Carbon Streaming Corporation (NEO: **NETZ**) (OTCQB: **OFSTF**) (FSE: **M2Q**) (“**Carbon Streaming**” or the “**Company**”) is pleased to announce its participation at the inaugural Canadian Climate Investor Conference, taking place on June 8, 2023, in-person at the Hyatt Regency Toronto.

The conference will bring together growth oriented, publicly traded climate-focused and clean technology companies, and climate conscious investors, to share ideas and discover ways to accelerate the deployment of capital needed to build a more sustainable future for Canadians.

Presenting companies will share how their businesses are advancing climate action while generating attractive returns for investors. Each presentation will take a market-oriented approach towards publicly traded climate investments designed to help democratize the ability for individual investors to participate in growing the clean economy and to accelerate the deployment of finance required for a net-zero future.

This conference is organized by founding members RE Royalties, Carbon Streaming, UGE International, ReVolve Renewables, Solar Alliance, Evergen Infrastructure, Electrovaya, Clear Blue Technologies, Westbridge Renewables, and Synex Renewables. These companies, along with others, will present at the conference. Founding partner sponsors include the TMX Group and Water Tower Research.

The conference welcomes climate and impact focused institutional investors, financial institutions, portfolio managers, retail investors, advisors, and professionals to learn and discuss directly with companies on solutions to achieve a net-zero future through climate-focused, clean energy and technology investments. Entry to the conference is free for investors and registration is required in advance.

In its inaugural year, the 2023 Canadian Climate Investor Conference will feature:

- Presentations from Carbon Streaming, RE Royalties, UGE, ReVolve, Solar Alliance, Evergen, Electrovaya, Clear Blue Technologies, Westbridge, Synex, and more;
- 10+ sessions and interactive peer roundtables covering a variety of investment topics;
- One-on-one meetings;
- Networking with potential partners and over 100 climate conscious investors.

### **About Carbon Streaming**

[Carbon Streaming](#) aims to accelerate a net-zero future. We pioneered the use of streaming transactions, a proven and flexible funding model, to scale high-integrity carbon credit projects to advance global climate action and additional United Nations Sustainable Development Goals. This approach aligns our strategic interests with those of project partners to create long-term relationships built on a shared commitment to sustainability and accountability and positions us as a trusted source for buyers seeking high-quality carbon credits.

The Company's focus is on projects that have a positive impact on the environment, local communities, and biodiversity, in addition to their carbon reduction or removal potential. The Company has carbon credit streams and royalties related to over 20 projects around the world, including high-integrity removal, reduction and avoidance projects from nature-based, agricultural, engineered and community-based methodologies.
